

## Creating Analytics in The Predictive Index® Software

Hover over the BROWSE dropdown in the PI Software.

The screenshot shows the top navigation bar of the Predictive Index software. The 'Browse' dropdown menu is open, displaying a list of options: Dashboard, Assessment Center, Folders, Teams, Organization, Employee Directory, and Analytics. The 'Analytics' option is highlighted in purple. To the right of the dropdown, the user profile for Larry Paul is visible, including his email address (lphillips@advisausa.com), assessment date (2016 May 13), and a brief description of his personality type (Guardian). A purple button labeled 'This is me' and a link 'Not you? >' are also present.

From the Dropdown, select Analytics.

Under the Add People or Team and Search Jobs, search for the people and jobs you would like to add, then click CREATE REPORT.

### Analytics

Choose a Team of People to compare their drives and behaviors:

**Limits:** You will not be able to select People who have not completed their behavioral assessment.

Select a job if you'd like to compare your team to that job range
